Sir:

Pursuant to 37 C.F.R. §§ 1.97 and 1.98, applicant(s) hereby submit(s) an Information Disclosure Statement for consideration by the Examiner.

I. LIST OF PATENTS, PUBLICATIONS OR OTHER INFORMATION

The patents, publications, or other information submitted for consideration by the Office are listed on the PTO-SB08(s), attached hereto.

II. COPIES

- ☒ a. Copies of cited U.S. patents and patent application publications are not included.
Copies of foreign patent documents and non-patent literature are included.

☐ b. Some or all of the documents listed on the PTO-SB08 are not enclosed because they were cited in the International Search Report and copies should already be in the PTO file. If copies are needed, please contact the undersigned.

☐ c. REFERENCES PREVIOUSLY CITED OR SUBMITTED - Pursuant to 37 C.F.R. §1.98(d), consideration of information listed on the PTO-SB08 form(s) is requested since any patents, publications, or other information which are listed on the PTO-SB08 form(s) but for which copies are not enclosed herewith, were previously cited by or submitted to the PTO in one of the following applications which has been relied upon for an earlier filing date under 35 U.S.C. § 120:

III. CONCISE EXPLANATION OF THE RELEVANCE

(check at least one box)

☐ a. DOCUMENTS IN THE ENGLISH LANGUAGE - The patents, publications, or other information listed on the attached PTO SB08 are in the English language and therefore, do not require a statement of relevancy.

☒ b. DOCUMENTS NOT IN THE ENGLISH LANGUAGE - A concise explanation of the relevance of all patents, publications, or other information listed that is not in the English language is as follows: An English language abstract is provided for all references.

☒ c. ENGLISH LANGUAGE SEARCH REPORT - An English language version of the search report or action that indicates the degree of relevance found by the foreign office is attached, thereby satisfying the requirement for a concise explanation. See MPEP 609(III)(A)(3).

☒ d. OTHER - The following additional information is provided for the Examiner's consideration. **Due to the non-existence of an English language equivalent of the documents cited in the International Search Report dated May 30, 2005, below is a summary of the contents of the four citations cited in the International Search Report:**

Document D1, FR 594 094 A

Document D1 relates to a continuous transport of dishes through a machine for cleaning the dishes and sterilizing them. According to Figure 1 of document D1, a cross section through one embodiment according to the solution of document D1 is given. Dishes 3 are being stored upon a roller tray which is arranged on guides 2 and being transportable through a couple of zones 1. After the trays 9, in which a contact of the dishes with rinsing or cleaning fluid occurs, the roller tray leaves the cleaning zones and passes a drying section. Within the drying section, warm air is directed to the dishes 3 to dry them. Within the drying zone, a couple of partitions 39 are arranged which are fed with hot air 37 by conduits 38. The hot air 37 is being mixed with fresh air 40. According to the inclination of the conduits of hot air embodied as partitions 39, the warm air has besides a vertical component a horizontal component resulting in a partition of the hot air being directed against the direction of transportation of the dishes through the dish-washing apparatus according to the solution in document D1.

Document D2, DE 43 10 189 A1

Document D2 is related to a separation curtain for cleaning zones within a dish-washing apparatus. According to document D2, curtains are disclosed which are made of a material which allows a non-exact separation of cleaning zones from one another and which is resistant to temperature, resistant to cleaning agent, unsoluble to water, flexible and suitable for arrangements within a dish-washing apparatus. The curtain according to document D2 has a triple layer shape made from thin strips of glas-fiber material and allows for a separation of cleaning zones from one another within a dish-washing apparatus.

Document D3, FR 2 059 793 A

Document D3 is related to a heat recovery device for a dish-washing apparatus. The dish-washing apparatus comprises a cooling device which permits for a suction of humid air which transports this humid air through a condensor. Further, devices are arranged to condense rinsing water within the cooling apparatus.

Document D4, DE 18 32 502 U

This German utility model is related to a dish-washing apparatus. A dish-washing apparatus is disclosed in which cleaned dishes are passing a drying tunnel. By means of a suction device 4, 3 between the dish-washing apparatus and the drying tunnel 2, humidity is removed. Within the dish-washing apparatus and within the drying tunnel 2, a lower pressure is generated as compared to the pressure prevailing in the cleaning zones. By means of this pressure gradient, an escape of humidity from the dish-washing apparatus as well as the drying tunnel 2 into the

surrounding is prevented. The drying tunnel 2 is arranged in a length which guarantees that the entire drying of the dishes takes place within said tunnel.
